

We are sorry to hear that you are having medical issues related to parasites. However, The American Society of Parasitologists is not an organization of medical doctors. Therefore, we cannot dispense medical advice, make diagnoses or make referrals. If there is a university or medical school near you, you could see if there are any parasitologists on their faculty who might be able to answer your questions or provide someone who can. Below is a list of some additional resources that might be able to help you with your medical parasitology issues. We wish you well.
